Freshening your air has never been easier with d-odor

Welcome to D-Odor, a startup that is revolutionizing the way you breathe. We are a team of passionate engineers, designers, and scientists who believe that everyone deserves to enjoy clean and fresh air in their homes and workplaces.

Our mission is to create innovative and affordable technologies in India that can filter out harmful gasses, allergens, odors, and viruses from the air. Our products are easy to use, energy-efficient, and stylish. They can improve your health, mood, and productivity by providing you with a better indoor environment.

Whether you suffer from allergies, asthma, or just want to breathe easier, D-Odor is the perfect solution for you. Join us today and discover the difference that D-Odor can make in your life. We are supported by IIT Delhi and MEITY (Ministry of Electronics and Information Technology).

D-odor: India's 1st chemical free deodorizer

D-Odor is an outcome of 2 years of research and field tests. It has been tested under some extreme conditions. D-Odor employs an innovative technology to eliminate unpleasant odours and harmful gases. Air is drawn into the unit, exposing it to ultraviolet light that neutralizes the bacteria and viruses. It then hits the a specially designed mesh with UV activated nano particles.

The harmful gases such as Ammonia, Methane, Hydrogen Sulphide etc., that cause odour and bad smell, are broken down into water vapours and Co₂ - both of which are beneficial for plants. This technology ensures that D-Odor not only removes unpleasant odours but also breaks down harmful gases that cause them, providing a safe and effective solution for odour elimination.

Applications

Houses / closed rooms with pets

Smoking Lounges

Washrooms/ Rooms with Odour

Closed spaces with Mal-odour

Benefits

- Eliminates unpleasant odors rather than just masking them.
- Chemical-free solution for a safe and healthy environment.
- Breaks down harmful gases that cause odors.
- Plug and Play- Easy to use and electrically operated.
- Can be used in any room/washroom of your home or office.
- Compact and can be used in any room.
- Sterilises the air of Bacteria and viruses.
